SAEED AHMED

Egypt, Alexandria| +201276071616 | saeedahmedsaeed725@gmail.com | **LinkedIn**| **Github**

SUMMARY

Versatile Flutter Developer with solid experience in building high-performance cross-platform apps using Dart. Proficient in state management (Bloc/Cubit, GetX), RESTful API integration, Firebase, Google Maps, and local storage (SQLite, Hive, Shared Preferences). Follows Clean Architecture, SOLID principles, and Clean Code standards. Skilled in Git, CI/CD, and tools like Android Studio, VS Code, and FVM for optimized development.

EXPERIENCE

Junior Flutter Developer | Full-time
Remote | Jul 2025 – Present

- Collaborating with cross-functional teams to design and develop responsive mobile applications using Flutter.
- Assisting in app deployment to both Android and iOS platforms and Web
- Debugging and resolving performance issues across devices.

Freelance | Real estate
Remote | June 2024– September 2024

- Developed a real estate mobile app with booking features, map-based search, and real-time updates.
- Designed modular architecture using BLoC and Clean Architecture for scalability and maintainability.

Freelance | Taw3ya
Remote | January 2025– March 2025

- Built a feature-rich Islamic mobile application enabling Qur'an reading with tafsir, audio playback, verse reminders, and offline access.
- Delivered a polished, ad-free user experience with multilingual support and smooth performance across devices.

EDUCATION

- **Pharos University in Alexandria (PUA) — Alexandria, Egypt**
- **Bachelor of Computer Science – Artificial Intelligence | Oct 2021 – Jun 2025**

LICENSES & CERTIFICATIONS

- Complete Flutter & Dart Development Course– Udemy
- Deep Dive into Clean Architecture in Flutter– Udemy
- Responsive UI Design in Flutter– Udemy
- Master Git & GitHub– Udemy

PROJECTS

Tadabar | Tadabar official site
June 2023 – January 2024

- Built a privacy-focused, ad-free mobile app offering offline access to the Holy Qur'an with multi-language support, tafsir, hadith, and audio recitations.

- Integrated core features such as prayer times, Qiblah direction, Hijri calendar, verse reminders, and advanced search and interlinking.

- Delivered a smooth, user-friendly experience with customizable fonts, dark/light modes, and zero permission requirements.

Chess Mobile Game | Github
June 2025– July 2025

- Developed a full-featured real-time chess app with Blitz, Rapid, and custom game modes, real-time matchmaking, and ELO-based ranking.

- Integrated Firebase for multiplayer sync, user authentication, and push notifications; implemented Bloc for scalable state management.

- Enabled social features including friend system, profile viewing, match invitations, game history, and customizable board themes.

SKILLS

- Flutter | Dart
- Firebase | Supabase
- REST APIs (Dio, HTTP) | Postman
- MVVM | MVC |Clean Architecture
- Responsive & Adaptive Design
- Teamwork | Time Management | Adaptability

- Hive| SQLite | Shared Preferences
- Version control (Git, GitHub)
- Fluent in German
- SOLID Principles | Architectural design
- Payment Gateways |Localization | Google Maps
- Problem Solving | Leadership | Communication skills | Resolve issues | Creative
